

Erik G.

Frontend Developer | React & TypeScript | UI Engineer

Open to junior & entry-level frontend roles and freelance work · Los Angeles, CA / Remote

Los Angeles, CA · eghabuzyan@gmail.com · b-1-o.github.io/portfolio · linkedin.com/in/b1o · github.com/b-1-o

PROFESSIONAL SUMMARY

Front-End Developer with hands-on experience building modern, responsive and high-performance web applications. Strong in React, TypeScript, JavaScript and Next.js, with a focus on UI engineering, responsive design, accessibility, performance optimization and clean, maintainable code. Comfortable integrating REST APIs, working with PostgreSQL, and shipping to production on Vercel. Open to Frontend Developer, React Developer, UI Engineer and Web Developer roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, React, Next.js, Vite, Node.js

Styling & Motion: Tailwind CSS, CSS Modules, Framer Motion, Responsive Design, Figma

Data & APIs: REST APIs, PostgreSQL, YouTube Data API, Third-Party API Integration

Tools & Practices: Git, GitHub, Vercel, ESLint, Prettier, Cross-Browser Compatibility, Performance Optimization, Accessibility (a11y), UI/UX

Spoken Languages: Armenian (Native), English (Professional)

EXPERIENCE

Freelance Web Developer

2025 – Present | Los Angeles, CA

Independent

- Designed and developed responsive websites and web applications for personal, portfolio and client-focused projects.
- Built modern front-end interfaces using React, TypeScript, JavaScript, HTML and CSS.
- Integrated third-party APIs and external services into production applications.
- Deployed and maintained applications on Vercel and GitHub Pages; version control with Git & GitHub.
- Optimized responsive layouts, animations, loading performance and mobile interactions.
- Focused on clean UI, accessibility (a11y), cross-browser compatibility and maintainable frontend architecture.

PROJECTS

AI-Powered Web Experience

React · TypeScript · JavaScript · UI/UX

Modern AI-focused web application with an interactive UI, smooth animations and responsive layouts. Focused on frontend architecture, visual design and building an intuitive interface for AI-powered interactions.

b-1-o.github.io/AI

HEAVEN — Developer Command Center

Next.js · TypeScript · PostgreSQL · Vercel

Dashboard aggregating projects, repositories and deployments into a single view. Designed the data layer to normalize multiple sources with optimistic updates.

heaven-b1o.vercel.app

Nothing — Product Experience

React · TypeScript · Vite · CSS

Recreation of the Nothing brand language — typography, high-contrast UI and subtle scroll motion built without heavy animation libraries.

b-1-o.github.io/nothing

b1api — Music Web App

React · JavaScript · YouTube Data API

Music web player with playlists and a persistent player across routes. Custom queue via React Context; YouTube Data API for search and playback.

b-1-o.github.io/music

MyUI — UI/UX & Frontend Design

React · JavaScript · CSS

Personal front-end playground for layout experiments, micro-interactions and motion — used to prototype ideas before they land in real projects.

b-1-o.github.io/myUI

EDUCATION

Self-Taught Frontend Development

Ongoing

Continuous hands-on practice through personal and open-source projects.
